JAVA (Core)

Contents

INTRODUCING JAVA

- What Is Java All About?
- Features of the Java Language
- The Java Environment
- Java Program Development

OBJECT-ORIENTED PROGRAMMING IN JAVA

- Encapsulation
- Polymorphism
- Inheritance
- Abstraction

PROGRAMS, DATA, VARIABLES, AND CALCULATIONS

LOOPS AND LOGIC

ARRAYS AND STRINGS

Arrays

- Array Variables
- Defining an Array
- Accessing Array Elements
- Initializing Arrays
- Using Arrays
- Multi-Dimensional Arrays
- Ragged Arrays
- Arrays of Characters

Strings

- String Literals
- Creating String Objects
- Arrays of Strings
- Operations on Strings
- Mutable Strings

Command line Arguments

CLASSES

- Concept and Definition
- Fields
- Methods
- Constructors
- Objects
- this reference
- Arrays of Class Objects
- Method and Constructor Overloading
- Static and non-static class members
- Singleton class
- Static blocks
- Final classes and class members

NESTED CLASSES

- Static Nested Classes
- Using a Non-Static Nested Class
- Using a Nested Class Outside the Top-Level Class
- Local Nested Classes
- Anonymous Classes

EXTENDING CLASSES

- Using Existing Classes
- Class Inheritance
- Inheriting Data Members
- Inherited Methods
- Overriding a Base Class Method
- The @Override Annotation
- Choosing Base Class Access Attributes
- Polymorphism and its types

- Using Polymorphism
- Multiple Levels of Inheritance
- Abstract Classes
- The Universal Superclass
- The toString() Method
- Determining the Type of an Object
- Methods Accepting a Variable Number of Arguments
- Casting Objects

INTERFACES

- Concept and Definition
- Interfaces Declaring Methods
- Static and Default Interface Methods
- Extending Interfaces
- Using Interfaces
- Interface Types as Method Parameters

PACKAGES

- Packaging Up Your Classes
- Adding Classes from a Package to Your Program
- Packages and Names in Your Programs
- Importing Static Class Members
- Controlling Access to Class Members
- Using Access Attributes
- Specifying Access Attributes

EXCEPTIONS

- Definitions and The Idea Behind
- Types of Exceptions
- Dealing with Exceptions
- The try Block
- The catch Block
- Catching Multiple Exception Types in a Block
- The finally Block
- Structuring a Method
- Execution Sequence
- Nested try Blocks
- Throwing and Rethrowing Exceptions
- Exception Objects

- The Throwable Class
- Defining Your Own Exceptions
- Defining an Exception Class
- Throwing Your Own Exception
- An Exception Handling Strategy

ASSERTIONS

- Concept
- Implementation

STREAMS

- Input and Output Streams
- Binary and Character Streams
- The Classes for Input and Output
- Basic Input Stream Operations
- Buffered Input Streams
- Basic Output Stream Operations
- Stream Readers and Writers
- The Standard Streams
- Getting Data from the Keyboard

ACCESSING FILES AND DIRECTORIES

- Accessing the File System
- Working with Path Objects
- Accessing System Properties
- Querying Files and Directories
- Obtaining File Attributes
- Creating and Deleting Directories and Files
- Getting the Contents of a Directory
- Moving and Copying Files and Directories
- Renaming a File or Directory

FILES

- File I/O Basics
- File Output
 - Writing a File using an Output Stream
 - Writing a File using a Writer
- Buffers

File Read Operations

 Reading a File using an Input Stream

 Reading a File using a Buffered Reader

Copying Files

Random Access to a File

SERIALIZING OBJECTS

Concept

Writing an Object to a File

Reading an Object from a File

THE COLLECTIONS FRAMEWORK

Understanding the Collections Framework

Collections of Objects

Sets

Sequences

Maps

Iterators

UTILITY CLASSES

Utility Methods for Arrays

Filling, Copying, Comparing, Sorting and Searching Arrays

Sets

Linked Lists

HashMaps

Iterators

Generating Random Numbers

Working With Date and Time

THREADS

Understanding Threads

Creating Threads

By Extending Thread class

By Implementing the Runnable Interface

Stopping a Thread

Connecting Threads

Thread Scheduling

Managing Threads

Synchronization

- Deadlocks
- Thread Priorities
- Thread Yields
- Thread Interrupts

APPLETS

- Concept
- Life Cycle
- Implementation
- Execution
- Interaction with host HTML

GUI BASED PROGRAMMING IN JAVA

- Graphical User Interfaces in Java
- Creating a Window
- Swing Components
- Swing Containers
- Container Layout Managers
- Adding a Menu to a Window
- Pop-Up Menus
- Adding a Toolbar
- Handling Events
- Interactive Java Programs
- Event-Driven Programs
- The Event-Handling Process
- Event Classes
- Using Dialogs
 - Modal and Modeless Dialogs
 - A Simple Modal Dialog
 - Instant Message Dialogs
 - Instant Input Dialogs

WORKING WITH DATABASE

- JDBC Concept
- JDBC Drivers
- Implementing Java Programs that talk with Database

NETWORKING

Concept

Implementation

Client Server Application Development using TCP Sockets

MINI PROJECT ON IMAGE PROCESSING
